

How we can help you with your Microsoft 365 data migration

Migrating to the Microsoft 365 cloud platform provides organisations with enhanced security, collaboration, and productivity.

Tools such as SharePoint Online, Teams, and OneDrive enable seamless communication and data management, while Microsoft 365 applications including Word, Excel, PowerPoint, and Outlook - support streamlined workflows and real-time collaboration. OneDrive offers secure cloud storage, improving flexibility and accessibility for remote work, and advanced cybersecurity features help protect sensitive data while ensuring compliance with regulatory standards.

NHS Midlands and Lancashire (NHS ML) provides a comprehensive data migration service to support NHS and public sector organisations in securely transferring data to Microsoft 365. Whether migrating from legacy file share servers, an existing Microsoft 365 tenant, or NHS Connect, our structured, secure, and fully managed migration process ensures minimal disruption and full compliance with NHS governance standards.

Our services

NHS ML offers a structured and flexible data migration service, ensuring secure and efficient transition to Microsoft 365.

Comprehensive project support

Our specialist delivery team manages the migration process from planning to post-migration assurance, ensuring a smooth and efficient transition.

Flexible migration options

We offer a range of tailored migration approaches to accommodate different data landscapes and organisational structures.

Validation and assurance

Our evidence-based migration process includes stringent data validation, providing full traceability and assurance that data has been securely and successfully migrated.

Why NHS ML?

Our team consists of highly skilled professionals with extensive experience in data migration, IT security, and NHS digital transformation.

- Microsoft 365 certified technicians - Experts in data migration, SharePoint development, and Microsoft 365 support.
- Cloud architects - Specialists in hybrid cloud strategies, balancing agility, security, and control.
- Cybersecurity experts - Providing risk assessments and security safeguards during migration.
- IT infrastructure engineers - Ensuring system compatibility and performance post-migration.
- Information governance specialists - Ensuring compliance with NHS data policies and regulations.
- Technical programme and project managers - Delivering structured, efficient, and compliant digital transformations.
- IT trainers - Providing tailored training and onboarding to ensure staff can maximise Microsoft 365 functionality.

Our service is designed to provide seamless integration, allowing organisations to enhance data accessibility, security, and collaboration while reducing reliance on outdated systems.

- Secure and compliant data migration aligned with NHS standards
- Tailored migration strategies to suit organisational needs
- End-to-end project management with post-migration support
- Expert guidance on Microsoft 365 tools and best practices
- Assurance of data integrity through validation processes.

How you'll benefit

Seamless and secure migration

Minimise disruption with an efficient, fully managed migration process.

Flexible service options

Choose full project delivery or collaborative support alongside internal teams.

Regulatory compliance

Ensure full alignment with NHS data governance and security standards.

Improved collaboration and efficiency

Leverage Microsoft 365 tools to enhance communication, data sharing, and remote work capabilities.

Expert guidance and post-migration support

Access specialist IT training and ongoing technical assistance to optimise Microsoft 365 adoption.
