

# How we can support your software assurance needs

Introducing new systems and software always carries a risk to the organisation. At NHS Midlands and Lancashire (NHS ML), we understand the critical importance of assessing and managing these risks.

Our software assurance solutions are instrumental in helping customers mitigate threats and enhance overall security posture. All systems and software must undergo a

new systems and software pre-procurement process assessment. This applies to, but is not limited to:

Systems containing sensitive data

- Desktop applications
- Mobile apps
- Cloud-hosted and on-premises solutions licensed with security patching subscriptions

## How you will benefit

- Peace of mind
- Enhanced security posture
- Customised solutions
- Cost efficiency
- Increased trust and confidence
- Streamlined operations
- Regulatory compliance
- Continuous improvement
- Empowerment through training

## What we offer

**NHS ML provides a robust framework to identify, manage and mitigate software related threats, leading to enhanced security and reduced risk exposure.**

### Our approach includes:

- Early detection of vulnerabilities
- Compliance with industry standards
- Risk management strategies
- Secure coding practices
- Incident response planning
- Comprehensive testing
- Continuous monitoring
- Integration with development, security, and operations (DevSecOps)

## What our specialists can do:

Our multifaceted skilled specialists provide tailored solutions that will significantly contribute to the security and operational efficiency of customers. Our security solutions will address the unique challenges faced by organisations by providing:

- Vulnerability assessments
- Security policy development
- Incident response planning
- Security integration
- Training and awareness initiatives
- Continuous monitoring
- Collaboration with stakeholders

## How we can help:

As a trusted partner, we can help our customers navigate the complexities of security and software assurance by:

- Crafting tailored solutions
- Providing knowledge and expertise
- Conducting vulnerability assessments
- Innovative technologies
- Continuous support
- Create a collaborative approach

## Why choose us

We provide a robust security framework that not only safeguards your assets but also enables your organisation to operate confidently and efficiently in a dynamic business environment.

**Expertise and experience**

**Value for money**

**Tailored solutions for diverse needs**

**Proven track record of success**

**Commitment to innovation**

**Comprehensive service offering**
